

Customer/Subscriber drop clamp

3-5mm drop cable clamp

Product Overview

The drop wire clamp 5/35 FTTH is used for the dead-ending of Ø2,5 to 5mm aerial drop cables on distribution networks where spans do not exceed 70m. This one piece thermoplastic clamp is made up of a closed conical body, a round groove wedge attached to the body by a tie and a open bail to secure it directly on pole fittings. The 5/35 FTTH can be secured to many different types of closed or opened hardware (min Ø 10mm holes).

Features

- Monobloc and cost-efficient design
- Simple, fast and tool-less installation
- Effective clamping of the cable by conical wedging.
- Adjusting the drop wire load or sag by blocking the wedge in a backwards position
- Direct installation on mounting hardware Ø10mm min, eye or pigtail type

Model	Material	Cable	Weight	Pack
5/35 FTTH R	UV protected thermo-plastic	2.5—5mm	0.03 kg	100

Item	Code	Cable diameter	Weight
