

## MOBRA Chamber Bracket No-Drill

---

### Product Overview

The Hexatronic MOBRA Chamber Bracket No-Drill range has been designed to comply with Openreach standards for use within the PIA network. There are 3 Mobra brackets to cover Openreach chambers JF2, JF4/JF6 and JF10. There are 2 Pivot arms dependant on the size of the Joint box footway and closure that is being installed.

### Applications

The Hexatronic MOBRA Chamber Bracket No-Drill is designed to be installed in the Underground network to support and restrain optical fiber closures. The Pivot arm can then be rotated 90° upwards and locked then the engineer can work on the closure safely.

JF2 cover

JF4 Single cover  
JF6 Twin covers

JF10 Triple covers

Modular Box Conversion Bracket No-Drill For Use With Modular Box
