

Compact ASN bracket

Compact ASN bracket for pole mounting above step

Product Overview

The compact ASN bracket is developed to provide a mounting based for the Hexatronic ASN box. The raised mounting profile facilitates a compact cable storage area to the rear of the box..

The bracket can be wall or pole mounted.

When pole mounting, the box can be secured with either metal straps or screws.

Applications

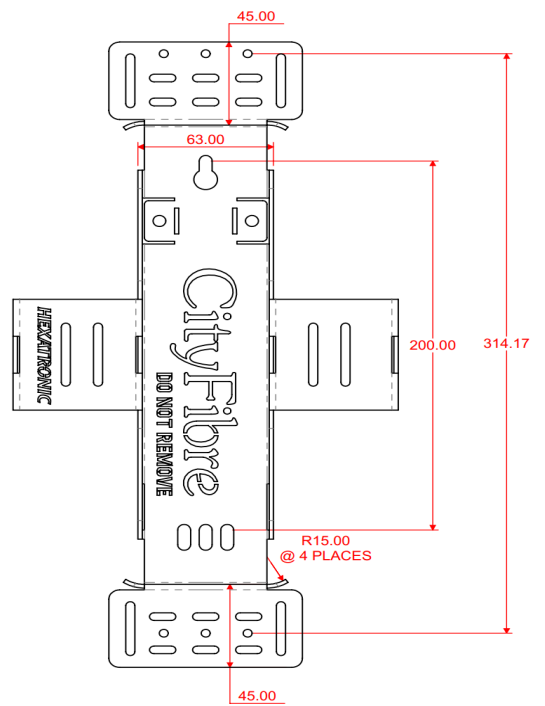

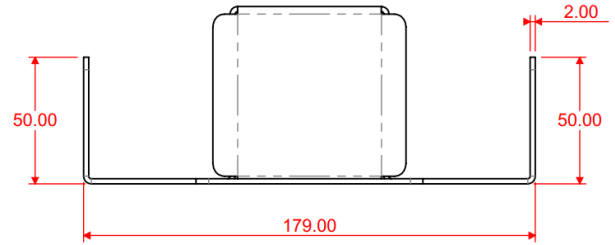

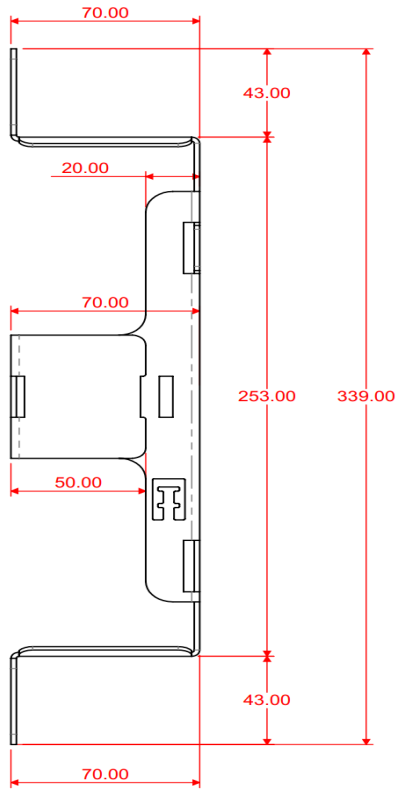

- Duct and pole access - Space reservation in build phase.
- Excess cable storage
- Offset mounting of boxes for congested poles

Features

- Stainless steel
- Black powder coated
- Keyhole screw mounting at top of bracket
- Stabilizing fixing points to reduce rocking on pole
- Universal box mounting space
- Cable tie restraint fixings around cable storage area
- Suitable for 20m of 7mm ULW cable
