

Discreet Cable Management

Discreet cable bend radius protection

Design

The clear PP material forms around the cable to securely retain the fibre to the wall. Supplied in packs of 100 the radius protectors can be used to provide discreet and secure cable installations

Application

Used along cable installation the clear discreet bend radius protectors enable cables to be installed tight to door frames, ceilings and walls.

Ensuring that the minimum bend radius is maintained is critical to ensure the subscribers optical power levels are maintained.

Features

- Clear bend radius cable retainers
- Self adhesive backed
- Transparent material
- Suitable for 1-3mm cable
- Offers protection from 90 to 180 degrees

Technical Information
