

Duct cleaning sponges 7mm

Product Overview

The Hexatronic cleaning sponge is used when testing or cleaning a microduct from dust or moisture. The sponge is simply blown through the microduct by air pressure from the installation tool.

Features

- Fits all microducts with ID 3.5 to 16mm
- Ensures clean duct for best blowing performance
- Quick and easy cleaning operation

Applications

The sponges are also used to smear out cable blowing lubricant in microducts.

Design

The cleaning sponges are made of medium density polyurethane form. The material is homogeneous and do not leave fibrous. It is compressible up to 50%
