

Subscriber Underground Access Chamber (Toby)

Product Overview

The subscriber underground access chamber/ Compact surface box or Toby is designed to offer operations a universal modular chamber for housing subscriber terminations at customer demarcations.

The underground chamber can be used as a connection point for microduct links. Minimising the effort and investment required to convert a network from homes passed to homes connected.

Features

- Narrow footprint for narrow trenching
- 285mm depth with internal rodding/radius bend
- Self draining anti-slip surface, grade C tread depth.
- Load bearing, exceeds Grade C
- Snap close lid with provision for security screw fixing
- Embossed with customer wording/logo

Technical Information

Product colour	Black PP gloss
Temperature operation	-45 to 90
Temperature storage	-45 to 90
Temperature installation	-45 to 90

Conformance:

Able to withstand loads of up to 5.5kN in accordance with BS 5834-2 testing. Exceeding requirements for a grade C lid.
