

Product Overview

The Hexatronic CTB (CSP) enables Blown Fibre and fixed cable access to the customer premises. Compatible with all standard deployment methods including Blown Fibre Drop Tube and fixed cable from overhead, external duct or internal duct.

The unique two layer management system provides separate work areas for both Network and Access. The product can be supplied unloaded or with an LC adapter.

To ensure the product is presented well on customer properties. The CTB interfaces directly with standard Capping and hardware.

Features
