

Mechanical Field Connector

Product Overview

The Field Termination Connector is designed to manage fast, easy and stable on-site fibre connection with a unique V-groove technology. The cable clamping method offers stable cable retention and installer convenience. It reduces connection defect rate by allowing re-assembling several times in the field without an additional tool. It accommodates 0.9mm, 2.0mm, 3mm (round) and 3x2 (flat cable)

Features

- High quality fibre optic LC/APC adaptors
- For optical distribution frames
- All closures
- Wall outlets
- And other termination units
- Premium grade materials
- Lowest connector loss

Applications

The Hexatronic LC/APC mechanical field connector enables low fibre and connector loss over multiple closures.

Specifications

The Hexatronic LC/APC mechanical field connector is made from premium grade materials for the best results.
